

# Remote Usability Testing

## Report of David Bozin

### Project Report

#### Task: 1

**Prototype Title :** DavidBozin\_TanitiTourism-C856

**Prototype Description :** 1. Confirm menu navigation is functional 2. Find site contact information 3. Find information about available recreation 4. Find answers to frequently asked questions 5. Test fluid design/mobile device compatibility

**Started On :** 2020-04-16 21:48:35

**Last Updated On :** 2020-04-21 18:01:57

#### Task: 2

**Reviewed Prototype :** Taniti\_Website\_Prototype

**Prototype of :** John Brazzell

**Feedback :** 1. Yes, but having text and button not centered, or not symmetrically offset may make site unappealing. 2. Yes, very clear and readable. 3. Yes, clear and immediately understandable. 4. Yes. Consider getting a separate and descriptive image for each main page. 5. The individual colors are fine, but do not work well together. Either consider using a darker or Navy blue with the black, or a lighter blue or grey with the pastel blue.

#### Task: 3

**Reviewed Prototype :** Taniti's Website - Prototype

**Prototype of :** Rene Alfaro

**Feedback :** For task #2, I did not expect to find local bank information on the "Business Inquiries" page, but rather, on the FAQ page. All other tasks are intuitive and able to be accomplished with ease. The overall structure is sound and intuitive. Only changes I would

suggest are stylistic, such as placement of text and images, fonts, and spacing.

**Date of Feedback :** 2020-04-17 02:14:41

## Task: 4

**Reviewed Prototype :** Vacation Taniti

**Prototype of :** Aaron Bowers

**Feedback :** Sorry, I messed up with the recording. Skip to 8:40 for your part. Everything was straightforward and intuitive. The only change to structure I would recommend is giving each lodging location their own results page. It can be confusing finding which result pertains to the needed location quickly. Most important style change would be to not use comic sans. Almost any other font looks more professional.

**Date of Feedback :** 2020-04-17 02:41:55

## Project Review

### Review: 1

**Feedback :** Very nice looking site. I like the flow and the dynamic aspect. The colors are pleasant. All tasks were easy to perform. Nice job!

**Date of Review :** 2020-04-19 20:01:06

### Review: 2

**Feedback :** This site prototype was very well done in my opinion. The site design was attractive and contained all necessary information. The links were easy to understand and follow.

**Date of Review :** 2020-04-21 18:01:56

[Prototype Feedback](#)

### Review: 3

**Feedback :** Tasks 1-4 were easily accomplished. The navigation menu was fully functional and easy to find. The site contact information was easily found and there were two options for

contact. The recreation screen gave information about recreation and the island as well. I would have enjoyed just information about recreation options. I knew what FAQ was, so I was able to find the frequently asked questions, but that could have been difficult if a user didn't know what that stood for. I did not understand task 5 and how to accomplish that from the usability site so I was unable to test that.
